Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it contains numerous grammatical errors. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent 3-5098.

In regard to claim 1, '098 discloses a branch tee fitting comprising: a tubular body portion (4) having a pair of openings at both ends; and a tubular branch portion (3) perpendicular to the tubular body portion (4), the tubular body portion (4) and the tubular branch portion (3) being formed in such a manner that one plate (1) is bent and along a plane inclusive of the center line of the tubular body portion (4) and the center line of the tubular branch portion (13), facing edges of the bent plate (1) are joined in superposed relation, angles (surface of bent over tab perpendicular to 8 and 8' connecting the tabs 8, 8' to the back of 1 in fig. 9) between the tubular body portion (4) and the tubular branch portion (3) being formed with flat portions (7), respectively, in which corners 7 of the plates (1) are superposed to each other, wherein the branch tee fitting includes engaging pawls (8, 8') for engaging the superposed flat portions (7).

In regard to claim 2, wherein each of the engaging pawls (8, 8') is formed on one of the superposed flat portions (7), and constructed so that it is bent over the other of the flat portions to engage both of the flat portions 7.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent '098 in view of Wendel.

Japanese Patent '098 discloses a tee-fitting as described above, but does not disclose the tee fitting having smaller diameters than the fitting portions. Wendel teaches that making fittings with uniform diameters (fig. 9) or fittings with larger end diameters (fig. 11) are well known equivalents in the art. Therefore it would have been obvious to one of ordinary skill in the art to make the uniform diameter end fittings of Japanese Patent '098 with larger end diameters because inasmuch as the references disclose these elements as art recognized equivalents, it would have been obvious to one of ordinary skill in the exercise art to substitute one for the other. In re Fout, 675 F.2d 297, 301, 213 USPQ 532, 536 (CCPA 1982).

Allowable Subject Matter

6. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Petroczky, Bertil, Recker, Robinson, Cornell and Brampton all disclose similar couplings common in the art.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David E. Bochna whose telephone number is (571) 272-7078. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
